

EMFT

Date.....

Unit-1

- ① Transformation of vectors (2)
- ② Laplace & Poisson's Equation
- ③ M-Method of image applied to plain boundaries
- ④ Divergence Theorem
- ⑤ Stokes Theorem
- ⑥ Boundary conditions
- ⑦ Energy stored in electrostatic field

Unit-2

- ① Faraday's Law (2)
- ② Ampere Circuital Law
- ③ Gauss law in Differential form
- ④ Energy stored in a magnetic field
- ⑤ Maxwell Equations
- ⑥ Continuity Equation of Time varying fields
- ⑦ Inconsistency in Ampere's Law
- ⑧ Boundary conditions.

Unit 3

- ① Poynting Theorem & Poynting Vector (2)
- ② Phase Velocity, group velocity
- ③ Skin Depth
- ④ Polarization
- ⑤ Continuity Equation

Unit 4

- ① Transmission line equation (2)
- ② Characteristic Impedance
- ③ Smith Chart
- ④ Single Stub Double Stub
- ⑤ Standing wave & reflection losses
- ⑥ Distortionless line ^{Spiral}
- ⑦ Input Impedance
