UNIT -1

INTRODUCTION TO MANAGERS AND MANAGEMENT

*****Introduction to
Management:*****

- Management involves directing and controlling resources to achieve organizational goals efficiently and effectively.

- It encompasses various functions and levels within an organization to ensure smooth operations and goal attainment.

Definition of Management:

- Management is the process of planning, organizing, leading, and controlling resources (human, financial, and material) to achieve organizational objectives.

Role of Management:

- - Managers play a pivotal role in coordinating resources, making decisions, setting goals, and overseeing operations to achieve the organization's mission and vision.

Functions of Managers:

- Management functions include planning (setting goals), organizing (arranging resources), leading (motivating and guiding employees), and controlling (monitoring and correcting activities) to achieve objectives.

Levels of Management:

- Management operates at three main levels: top management (setting strategic direction), middle management (implementing plans), and lower-level management (supervising employees).

Management Skills and Organizational Hierarchy:

- Managers require a blend of technical, interpersonal, conceptual, and decision-making skills to effectively lead teams and navigate the organizational hierarchy.

*****Social and Ethical Responsibilities of Management:*****

- - Businesses hold social responsibilities toward society, encompassing ethical considerations in decision-making processes and operations.

*****Arguments for and against Social Responsibilities of Business:*****

- - Arguments in favor emphasize corporate citizenship and long-term sustainability, while opposing views focus on profit maximization as the primary goal.

-

*****Social Stakeholders:*****

- - Entities affected by a company's actions, including employees, customers, communities, and shareholders, among others.

*****Measuring Social Responsiveness and Managerial Ethics:*****

- - Companies use various metrics and standards to measure their social impact, and managerial ethics dictate decision-making aligned with moral and legal principles.

*****Omnipotent and Symbolic View:*****

- Omnipotent view suggests management has significant control over organizational outcomes, while the symbolic view posits that external factors often shape outcomes more than managerial actions.

*****Relevance of
Political, Legal,
Economic, and
Cultural
Environments
to Global
Business:*****

- These external factors greatly influence the strategies and operations of global businesses, shaping their decisions and adaptation strategies.

*****Structures and Techniques in International Organizations:*****

- Organizations employ various structures (functional, divisional, matrix) and techniques (joint ventures, strategic alliances, acquisitions) to expand and operate globally, considering diverse markets and cultures.

UNIT -2

**TITLE: PLANNING
AND DIRECTING
IN MANAGEMENT**

*****Planning:
Nature &
Purpose:*****

- Planning involves outlining goals, identifying actions, and allocating resources to achieve objectives effectively.
 - Its purpose is to guide decision-making, reduce uncertainty, and ensure organizational success.

*****Steps Involved in Planning:*****

*****Objectives: Setting Objectives:*****

- Objectives are specific, measurable, achievable, relevant, and time-bound (SMART) goals that guide organizational efforts.
- Setting objectives involves defining clear targets aligned with the organization's mission and vision.

*****Process of Managing by Objectives:*****

- Management by Objectives (MBO) involves setting clear goals collaboratively, monitoring progress, and rewarding achievements, enhancing employee motivation and performance.

*****Strategies, Policies & Planning Premises:*****

- - Strategies are long-term plans outlining how to achieve objectives. Policies are guidelines directing organizational actions.
- - Planning premises are assumptions about future conditions crucial for effective planning.

*****Competitor Intelligence & Benchmarking:*****

- Competitor intelligence involves gathering information about rival firms to gain a competitive advantage.
- Benchmarking entails comparing organizational processes, performances, and practices against industry's best standards to improve operations.

*****Forecasting, Decision-Making:*****

- - Forecasting involves predicting future events or trends crucial for planning.
- Decision-making is a key managerial function involving choosing among alternatives to achieve organizational goals.

*****Directing: Scope & Human Factors:*****

- - Directing involves guiding and supervising employees to achieve organizational objectives.
- Human factors encompass understanding and leveraging human behavior and motivation in directing efforts

*****Creativity and Innovation:*****

- - Encouraging creativity and fostering innovation are crucial for organizational growth and competitiveness.

*****Harmonizing Objectives, Leadership: Types of Leadership:*****

- - Harmonizing objectives involves aligning individual and organizational goals.
- Leadership styles include autocratic, democratic, laissez-faire, transformational, and transactional, impacting organizational culture and performance.

*****Managers as Leaders, Early Leadership Theories:*****

- - Managers often serve as leaders, influencing and inspiring their teams.
- Early leadership theories include trait theories (focused on inherent qualities), behavioral theories (emphasizing actions and behaviors), and contingency theories (considering situational factors).

*****Managerial Grid, Contingency Theories of Leadership:*****

- - The Managerial Grid evaluates leadership styles based on concern for people and concern for production.
- Contingency theories suggest that effective leadership depends on situational factors such as task structure and leader-member relations.

*****Path-Goal Theory, Contemporary Views of Leadership:*****

- - Path-Goal Theory posits that effective leaders clarify paths to goals, remove obstacles, and provide support to followers.
- - Contemporary views focus on adaptive, servant, and authentic leadership styles, considering changing organizational landscapes.

*****Cross-Cultural Leadership, Leadership Training, Substitutes of Leadership:*****

- Cross-cultural leadership involves understanding and adapting leadership styles to diverse cultural contexts.

- Leadership training enhances managerial skills and develops effective leadership behaviors.
- Substitutes of leadership are aspects within a work environment that can replace or negate the need for direct leadership.

UNIT -3

ORGANIZING IN MANAGEMENT

*****Organizing:*****

- - Organizing involves structuring and arranging resources within an organization to achieve objectives efficiently.
- It encompasses creating roles, establishing relationships, and defining responsibilities.

*****Benefits and
Limitations:*****

- - Benefits include enhanced efficiency, clarity in roles, improved coordination, and better resource utilization.
- Limitations may involve rigidity, slow decision-making, and difficulty in adapting to change.

*****De- Centralization and Delegation of Authority:*****

- - De-centralization involves dispersing decision-making authority across various levels in an organization.
- - Delegation of authority entails assigning tasks and responsibilities to subordinates while retaining accountability.

*****Authority versus Power:*****

- - **Authority** refers to the legitimate right to give orders, whereas **power** is the ability to influence others, often beyond formal authority.

*****Mechanistic
Versus Organic
Organization:*****

- - Mechanistic structures are rigid, hierarchical, and formal, while organic structures are flexible, adaptive, and decentralized.

*****Common Organizational Designs:*****

- - Functional, divisional, matrix, and network structures are common designs reflecting different ways to organize activities within an organization.

*****Contemporary Organizational Designs and Contingency Factors: *****

- - Contemporary designs emphasize flat structures, team-based setups, virtual organizations, and boundaryless organizations.
- Contingency factors like technology, environment, and strategy influence the choice of organizational design.

*****The Learning Organization: Nature and Purpose:*****

- - Learning organizations prioritize continuous learning, adaptability, and knowledge sharing to thrive in dynamic environments.

*****Formal and Informal Organization:*****

- - Formal organization refers to the official structure and hierarchy, while informal organization encompasses unofficial relationships and networks within an organization.

*****Organization Chart, Structure, and Process:*****

- - Organization charts visually represent the formal structure, displaying hierarchy and reporting relationships.
- Structure defines roles, responsibilities, and communication channels, while processes outline workflows and procedures.

*****Departmentalization by Different Strategies: *****

- - Departmentalization involves grouping activities based on functions, products, geography, or customers to facilitate efficient operations.

*****Line and Staff Authority: Benefits and Limitations:*****

- - Line authority involves the right to make decisions, while staff authority offers advice and support.
- Benefits include specialization and expertise, but limitations might involve conflicts between line and staff roles.

*****Staffing:*****

- - Staffing involves acquiring, training, and retaining competent employees to fulfill organizational objectives.

*****Human Resource Inventory, Job Analysis, Job Description:*****

- - Human resource inventory assesses the skills and qualifications of existing employees.
- - Job analysis involves studying and documenting job duties, responsibilities, and requirements.
- - Job descriptions outline tasks, responsibilities, and qualifications for a particular role.

*****Recruitment:*****

- Recruitment involves attracting and selecting suitable candidates to fill job vacancies within an organization.

UNIT 4

****CONTROLLING:****

*****Controlling:*****

- Controlling is a management function focused on ensuring organizational activities conform to planned objectives. It involves monitoring, comparing actual performance with predetermined standards, and taking corrective actions as needed.
- Controlling is an essential managerial function that ensures organizational goals are met by monitoring, evaluating, and adjusting activities as necessary. Adaptability and proactive measures are crucial in addressing contemporary challenges.

*****Introduction to Controlling System and Process:*****

- The controlling system involves establishing standards, measuring performance, comparing it against standards, and initiating corrective actions. It ensures that activities align with organizational goals.

*****Requirements for Effective Control:*****

- Effective control demands clear standards, accurate measurement methods, prompt corrective actions, and the involvement of all levels of management.

*****The Planning- Control Link:*****

- Planning and controlling are interlinked processes. Controlling involves evaluating if actual performance aligns with the planned objectives set during the planning phase.

*****The Process of Control:*****

The control process involves-

*****Types of Control:*****

Different types include-

- Feedforward control (anticipating problems)
- Concurrent control (real-time monitoring)
- Feedback control (correcting past deviations).

*****The Budget as a Control Technique:*****

- Budgets serve as a significant control technique, establishing financial plans and providing a benchmark for assessing performance.

*****Information Technology in Controlling:*****

- Technological tools aid in data collection, analysis, and real-time monitoring, enhancing the efficiency and accuracy of controlling processes.

*****Productivity, Problems, and Management:*****

- Controlling aims to improve productivity by identifying inefficiencies and addressing issues that hinder performance.

- Controlling oversees the overall organizational performance, ensuring alignment with strategic objectives.

*****Control of
Overall
Performance:*****

*****Direct and Preventive Control:*****

- Direct control involves immediate corrective actions, while preventive control aims to avoid potential issues before they arise.

*****Financial Controls: *****

- These controls involve monitoring financial activities, ensuring compliance with regulations, and managing financial risks.

*****Tools for Measuring Organizational Performance:*****

- Key performance indicators (KPIs), balanced scorecards, and performance appraisals are tools used to measure and evaluate organizational performance.

*****Contemporary Issues in Control: *****

- Workplace concerns like employee theft, violence, and ethical breaches pose challenges to effective control, demanding proactive measures to mitigate these risks.

BEST OF LUCK FOR EXAM!
