

Institute of Innovation in Technology & Management
FIRST INTERNAL EXAMINATION
FIRST SEMESTER [BCA] SHIFT [M] OCTOBER 2013

Paper Code: 105

Subject: Programming with C

Time: One Hour Thirty Minutes

Max.Marks:30

**Note: Attempt any *three* questions. All questions carry equal marks.
Quote syntax and example/code wherever necessary.**

Q.1. Briefly explain following terms (any five**):**

(10)

- a) C Character Set
- b) Variable
- c) Keyword
- d) Typedef
- e) Enumeration
- f) Conditional Operator

Q.2.

- a) What is an Array? What are its types? Explain in brief along with declaration and initialization. (5)
- b) Write a program to input array of ten numbers and print its sum. (5)

Q.3.

- a) Explain the methods of Type Conversion with the help of example. (4)
- b) What do you mean by Storage Classes? Briefly explain its types. (4)
- c) What do you mean by Recursion? Explain with the help of example. (2)

Q.4.

- a) What is a function? What is the importance of using it? What are elements of function? (1+2+2)
- b) What is the difference between Call by Value and Call by Reference? Explain with the help of a code. (5)

Q.5.

- a) Briefly explain any six type of operators used in C language. (6)
- b) Briefly explain various data types used in C language. (4)

Q.6. Differentiate between (Any five**):**

(10)

- a) lvalue Vs rvalue
- b) printf() Vs scanf()
- c) while loop Vs do while loop
- d) Formal Arguments Vs Actual Arguments
- e) Calling Function Vs Called Function
- f) Function Declaration Vs Function Definition
